

A scatter plot showing the relationship between Temperature (x-axis) and Day of Year (y-axis). The x-axis ranges from 2.2 to 3.4, and the y-axis ranges from 165 to 180. A solid black line represents the linear regression, showing a negative correlation. The data points are represented by black dots.

Temperature	Day of Year
2.25	181
2.45	175
2.55	169
2.55	167
2.55	162
2.80	161
2.85	164
2.85	169
2.85	170
2.85	175
2.90	163
2.95	166
2.95	170
3.00	170
3.05	170
3.15	168
3.15	172
3.25	166
3.35	164

Scatter plot showing the relationship between GDD (Growing Degree Days) on the x-axis and Day of Year on the y-axis for the year 2017. The data points are green dots, and a green linear regression line is fitted to the data. The x-axis ranges from 200 to 280, and the y-axis ranges from 165 to 180.

A scatter plot showing the relationship between Daylength (hrs) on the x-axis and Day of Year on the y-axis for the year 1997. The x-axis ranges from 18.5 to 21.5 with major ticks every 1.0 unit. The y-axis ranges from 165 to 180 with major ticks every 5 units. There are 12 data points plotted as blue dots, and a solid blue regression line is drawn through them, indicating a strong positive linear correlation.

Daylength (hrs)	Day of Year
18.5	162.5
18.6	163.5
18.7	164.5
18.8	165.5
19.0	166.5
19.2	167.5
19.4	168.5
19.6	169.5
19.8	170.5
20.0	171.5
20.5	172.5
21.5	175.0
